

5 WAYS PEAK NANOPLEX™ POWERS NEXT-GEN EVS

The EVs Industry is entering a new generation of deployments and technology and Peak's NanoPlex is the "power platform" that delivers, distributes and charges the electric vehicle world.

MORE ACCELERATION

NanoPlex delivers electric power faster for better acceleration

LONGER BATTERY LIFE

NanoPlex reduces the drain on batteries for longer lifecycles

OPTIMIZE POWER COOLING

NanoPlex reduces the need to for extra cooling hardware to lower build costs longer lifecycles

FASTER CHARGING

NanoPlex enables next-gen high frequency switches for faster charging

POWER CONDITIONING

Efficiently converts AC Powerlines to DC EV chargers to lower power costs
